

PRESS RELEASE

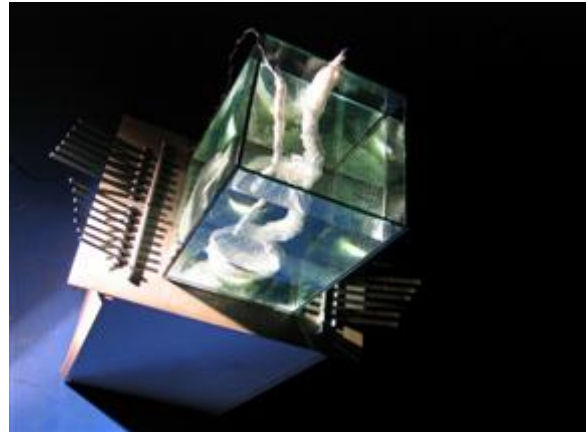

FOR IMMEDIATE RELEASE

GROUPE MOLIOR PRESENTS

Totem sonique in solo at the Maison de la culture Notre-Dame-de-Grâce

Totem sonique, an interactive sonic installation by **Martin Leduc**, will be presented at the Maison de la culture Notre-Dame-de-Grâce.

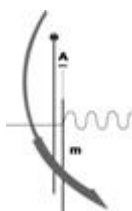

Totem sonique is an audio installation that consists of an invented acoustic instrument using lath resonators to put in vibration a steel plate, a wooden resonating chamber and a glass tank filled with water. Light emanates from the tank, enhancing the vibrations. The aim is to give everyone, musician or not, a collective sonic experience that is creative and unpredictable. A dialogue is also possible with the automaton, which generates sounds and plays with memories of the previous performances. The whole instrument can vibrate, produce a soft feedback in the tank, and underline or add elements in the collective creation.
